Filed: September 23, 1999
For: CYLINDER LOCK-KEY-COMBINATION

DECISION ON PETITION
37 C.F.R. 1.144

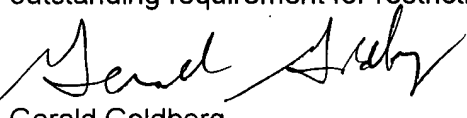

This is a decision on the Petition from requirement for restriction, pursuant to 37 C.F.R. 1.144, filed September 10, 2001.

The petition is **DISMISSED AS MOOT**.

A review of the record indicates that the instant petition was filed concurrently with a request for a Continued Prosecution Application and a preliminary amendment to the claims. In response to the preliminary amendment and the request for Continued Prosecution Application, the Examiner issued a first Office Action, mailed December 4, 2001, in which the prior requirement for restriction (made final in the Official Action mailed June 14, 2001) was superseded by a new requirement for restriction.

Inasmuch as the facts of the instant petition are directed to a different requirement for restriction, the instant petition is dismissed as moot.

The instant application will be returned to the examiner to await Applicants' response to the outstanding requirement for restriction.

Gerald Goldberg
Patent Examining Group Director
